HOW VENDING WORKS

AUTHENTICATE

The user self-authenticates with an employee badge or other optional login methods and enters. If required he can enter user-defined cost center.

SELECT

Through the touchscreen interface, the user selects the item(s) from the image screen or description displayed and enters the quantity.

ISSUE

The user selects the issue function, the item selected drops into a bin, and user removes dispensed item(s).

RECORD

The software records the transaction and the database is updated automatically.

ADVANTAGES OF VENDING SOLUTIONS
